## X-TREME LASER

### DESIGNED TO PERFORM

The LASER X-Treme is a designer exhaust that gives the bike a personal and stylish touch. The full Stainless Steel LASER X-Treme exhausts are available in a range of styles, from "bullet like" tapered versions to the more aggressive GP version.

Thanks to "Dual Sound" technology, flexibility in the noise level is available. By replacing the relevant insert you can choose between an officially homologated or real sport sound level without compromising your performance. When installed the inserts are not visible and do not detract from the styling of the exhaust.

# X-TREME STYLES

## POLISHED TAPERED

Where it all began! Top quality polished Stainless Steel. No.1 since the birth of the LASER X-Treme.

«DUAL SOUND»  
TECHNOLOGY

## TITANIUM LOOK TAPERED

Through a unique sandblasting process the exhaust looks Titanium, yet maintains its Stainless Steel durability.

«DUAL SOUND»  
TECHNOLOGY

## GP-STYLE

Real GP Look gives the bike a superb aggressive racing appearance.
