

The LASER K1200S/R/GT Stealth Slip-On Installation Picture 1

***Note the orientation of the LASER Stealth Muffler.**

Consult the BMW Service manual before you remove the stock system. The Laser Mid-Pipe connects to the stock headers in the same fashion.

Observe the mounting bracket on the inside of the passenger foot-peg.

Please follow the assembly instructions of the clamp and bracket provided in your hardware kit. There is a side view photo showing the assembly procedure.

Use great care in assembly. Align everything perfectly and when satisfied install the racing type springs (2) that attach the Laser Stealth to the intermediate pipe and tighten all connections. **Check the complete assembly after 50 miles and re-tighten if necessary.**

The installation must be performed by a professional.
